

In the Specification:

Please replace the paragraph starting on page 1 line 30 with the following amended paragraph:

For some types of peripheral media, the operating system automatically executes a predefined file stored on the medium when the operating system recognizes that the medium has been connected to the computer. For example, when a data CD is inserted into the CD drive of a Windows system, the operating system finds and executes a file on the CD called "autorun.inf". With some operating systems, ~~t[[T]]~~his feature is not available for simple removable storage devices, such as keychain storage devices.
